**1 Print and protect**
Print one mat at a time on US Letter. Slide it into a dry-erase pocket, laminate it, or tape it to a baking tray so the dough stays clean.

**2 Start with the dough**
Any playdough works. Offer 2 or 3 colors at a time, red, green and white are enough for every mat.

**3 No dough today?**
Use stickers, dot markers, torn paper, or a crayon to trace the shapes and fill the dashed circles instead.

**4 Black and white is fine**
The outlines are thick and the tints are light, so a black-and-white print works and uses less ink.

**Safety:** stay with your child the whole time. Playdough is not food, so keep it out of mouths. Small dough pieces, beads, buttons and other add-ons are a choking risk for children under 3, so for under 3s use big pieces only and let a grown-up roll the small ones. If your child has food allergies, read the label on your dough before you start.
